Art Unit: 1711

Claims 10-28 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9-21-04.

Applicant's election with traverse of Group I. Claims 1-9 in the reply filed on 9-21-04 is acknowledged. The traversal is on the ground(s) that examiner's suggested materially different process is not reasonable and that search of both inventions is not a burden. This is not found persuasive because the groups are maintained to be directed to distinct inventions for the reasons stated with separate searches and burden is maintained to exist.

The requirement is still deemed proper and is therefore made FINAL.

This application contains claims 10-28 drawn to an invention nonelected with traverse in Paper No. 09-04. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1711

It is noted that applicants' understanding/request presented in the second to last paragraph of their reply of 9-21-04 is correct, that applicable process of using claims will be rejoined with the appropriate elected allowable product claims upon the ultimate issuance of any allowance.

Upon further consideration of the remaining non-withdrawn claims and their subject matter, the following further restriction requirement is seen to be necessary.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to urethanizing catalyst, classified in class 502, subclass 200.
- II. Claims 5-9, drawn to isocyanurizing catalyst, classified in class 502, subclass 300.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and effects in that they are employed in the making of polyurethane and polyisocyanurate articles, respectively.

Art Unit: 1711

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
